

AVISON YOUNG

Avison Young - Case Study

xsign has provided signage that features at the Avison Young building in the heart of Birmingham.

The standout sign is the branded company logo which features as cut stainless steel letters, fitted to the wall, welcoming individuals as they arrive.

Additionally, the signage scheme features a number of acrylic panels with waypoint information, helping individuals navigate from the lifts to the Reception area.

Our work in the Birmingham area is extensive, as we continue to provide sign solutions to offices, medical practices and the Birmingham University campuses.
