

Royal Papworth Hospital

- Case Study

dlinexsign ltd have partnered with the Royal Papworth Hospital Trust and Skanska to deliver a suite of signs to the relocated Royal Papworth Hospital on the Cambridge Biomedical Campus.

We've delivered a suite of internal, wayfinding signs which include frosted acrylic on dark grey and a range of iconography. Externally, we've provided a set of cut letters for the outside of the building.

The updated branding and wayfinding provides contemporary design to an historic establishment.
